## Creating a PDF from Adobe® InDesign

1. Open your InDesign document and select File > Adobe PDF Preset.

**3.** In the Export window, all the settings are perfect for most publications\* so just click **Export.** InDesign will create a PDF of your InDesign document and save it to the place that you specified in step 2.

\*Note - If your publication has content that bleeds off the edge, your Document Setup must have bleeds set to .125" on all sides and content must extend to your red bleed line for this to work. When generating your PDF, you will need to select Marks and Bleeds from the menu on the left-hand side of the export window. Choose **Use Document Bleed Settings**, then Export. *Bleeds are not available on newsprint publications*.
